

What is it?

- the result of our long term experience with installing drywall, ceiling and acoustic tiles, combined with speaking and listening to what our customers need
- to be used on the Leonardo HD
- greatly simplifies the positioning of panels, saving manpower
- three different height positions to clear even the tallest man

Measurements

A	4200 mm
B	4900 mm
	45 kg
	40 kg
	Max. 3650 mm

Why use the Solo Gyps?

EFFICIENCY AND VERSATILITY

- eliminates manual drywall lifts
- makes working with drywall safer, faster and more productive
- a lightweight, motorized track and detachable adjustable frame helps the operator to hold and lift the panels effortlessly
- allows one man to lift panels without assistance
- total weight of only 99.2 lbs.
- holds panels up to 12 ft long and 89 lbs. heavy
- activated directly from the platform with a push of a button, the panel travels up the track into the overhead position, where it is positioned and held in place, leaving the operator free to screw or nail it to the joists/studs.
- tool-free setup
